

Metrixx AI — Prompt Catalog v2.0

88+ prompts · 13 categories · Two-phase delivery · Phase 1: June 16 Phase 2: June 25

Metrixx AI is a real-time textbook. Every prompt is a lesson. The Gamma Playbook extracts dealer sentiment no Bloomberg terminal provides. Options intelligence — ODTE, ETF options, Gamma Playbook — is the primary value layer. All prompts produce VAULT-ready structured output.

Standard response modes — all prompts

Every prompt surfaces a three-icon selector in the front end. User selects format before or after generation. Excel output auto-archives to VAULT with Metrixx disclaimer, subscriber ID, and watermark.

Short form

~50 characters. Ticker-style signal. Best for alerts, regime tags, and WATOS score display.

Long form

~50 words. Narrative brief with context, signal, and implication. Best for MY DESK briefings.

Excel / VAULT

Structured .xlsx. Metrixx disclaimer header, subscriber ID watermark. Auto-archives to VAULT on generation.

WATOS probability calculations TEAM TASK

Team to confer on probability inputs for each scoring dimension. Jocelyn owns the calculation spec. All prompts producing WATOS output must reference agreed inputs. WATOS naming convention: `WATOS_{SUBSCRIBER_ID}_{UNDERLYING}_{STRATEGY_CODE}_{YYYYMMDD}_{SESSION}.xlsx`

DIMENSION 1 Directional probability	DIMENSION 2 Gamma exposure weight	DIMENSION 3 Regime confidence (MIXX)
OUTPUT SIGNAL HIGH / MEDIUM / LOW	FILE NAMING WATOS_{ID}_{UNDERLYING}	STORAGE Auto-archive → VAULT

Prompt development workflow — all team members

- Draft with Claude** — each intern uses Claude to organize and structure content for their assigned section. Apply MSFE expertise and prior trading knowledge. New prompt ideas go to Gamma Playbook first — it is the primary differentiator.
- Post to ILLINI TEAM** — draft posted to the Rocket.Chat ILLINI TEAM channel (launched by Dimitris). All visibility in one place. No side emails.

- 3 **Jocelyn / Lambert review & commit** — technical review, GitHub commit. Nothing enters the repo without Jocelyn's sign-off. Lambert is deputy gatekeeper. Jocelyn allocates specific sections to each team member based on MSFE specialization.
- 4 **Activate with Dimitris** — approved prompts go to Dimitris for platform activation. **Ask Dimitris questions directly and frequently.** He owns the platform architecture and is on Rocket.Chat now.

[] DRAFTED

[] APPROVED

[] PRODUCTION READY

Hard gate: anything not PRODUCTION READY by June 14 does not make Demo Day (June 16). Phase 2 gate: June 23.

Phase 1 Options intelligence — core catalog

Due: June 16, 2026 (Demo Day)

1 **Gamma Playbook** FLAGSHIP

Dealer GEX, Put/Call Walls, Net Gamma, Pin Risk — SPX, QQQ, NVDA, TSLA, BTC. Team adds new prompts here first using MSFE and prior trading skills.

Primary differentiator. No Bloomberg terminal provides dealer gamma intelligence. All new prompt contributions from the team are added here first. Jocelyn allocates specific strikes and instruments to each intern based on MSFE specialization.

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
GP_001	Dealer net GEX daily brief	SPX, SPY	  
GP_002	Put/Call wall scanner — key strikes	SPX, QQQ, NVDA, TSLA	  
GP_003	Gamma flip level identification	SPX, SPY, ES	  
GP_004	Pin risk analysis — weekly expiry	SPX, QQQ	  
GP_005	Dealer hedging flow detector	SPX, NVDA, TSLA, AAPL	  
GP_006	Vanna & Charm exposure report	SPX, SPY (monthly roll)	  
GP_007	Dark pool + GEX correlation brief	SPY, QQQ	  
GP_008	BTC options GEX & sentiment	BTC, ETH (CME + Deribit)	  
GP_009	Gamma Playbook weekly synthesis	SPX, QQQ, NVDA, TSLA, BTC	  
GP_010	WATOS gamma score output	All GP instruments → VAULT	
GP_011+	<i>Team-contributed prompts (MSFE / prior trading skills)</i>	TBD — Jocelyn allocation	  

2 **0DTE Options Strategy** HIGH DEMAND

Same-day expiry mechanics, risk parameters, entry/exit triggers. Trend direction, Market Profile POC, and high-volume node summary required on all entry prompts — SPX, SPY, QQQ.

MP overlay required. Every 0DTE entry prompt must include trend direction, Market Profile POC, and high-volume node summary as standard context inputs to the prompt.

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
ODTE_001	Pre-market 0DTE setup brief + MP POC	SPX, SPY	  
ODTE_002	0DTE gamma exposure at open	SPX, SPY, QQQ	  
ODTE_003	0DTE momentum breakout + trend direction	SPX, SPY	  
ODTE_004	0DTE mean reversion at key strike	SPX, QQQ	  
ODTE_005	0DTE spread construction (debit/credit)	SPX, SPY	  
ODTE_006	0DTE risk parameter template	SPX, SPY — position sizing	 
ODTE_007	0DTE afternoon pinning strategy	SPX (2–4pm ET window)	  
ODTE_008	0DTE post-Fed/event day protocol	SPX, SPY — macro overlays	  
ODTE_009	0DTE exit trigger & stop logic	SPX, SPY — all setups	  
ODTE_010	0DTE WATOS scenario scoring	SPX, SPY → VAULT	

3 **ETF Options Intelligence** **HIGHEST DIFF.**

Volatility surface, skew analysis, block trades — SPY, QQQ, IWM, GLD, TLT, SLV, XLE, XLF, XLK.

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
ETFO_001	ETF options IV rank daily scanner	SPY, QQQ, IWM, GLD, TLT, SLV	  
ETFO_002	Sector ETF skew analysis	XLE, XLF, XLK, XLV, XLI	  
ETFO_003	ETF options term structure brief	SPY, QQQ, TLT	  
ETFO_004	ETF block trade detection alert	SPY, QQQ, IWM	  
ETFO_005	Gold/Silver ETF options volatility	GLD, SLV, GDX	  
ETFO_006	Rates ETF options — Fed cycle overlay	TLT, HYG, LQD	  
ETFO_007	Energy sector ETF options setup	XLE, USO, UNG	  
ETFO_008	Tech ETF options — earnings season	QQQ, XLK, SMH	  
ETFO_009	ETF covered call / cash-secured put	SPY, QQQ, IWM — income strategy	  
ETFO_010	ETF options WATOS report	All ETF options → VAULT	

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
ETFO_011	ETF regime-matched strategy selector	MIXX regime input → strategy output	  
ETFO_012	ETF options liquidity quality check	Bid-ask spread, open interest, volume	  

4 Options Strategy Lab **RESPONSE SCRIPTS**

Scenario-based construction, IV rank, regime-matched approach. Each prompt includes a prescribed response script. Founder + Premium tier only.

Response scripts required. Each OSL prompt must include a standardized conversational script prescribing how the platform responds to user inputs during the strategy session. This creates a consistent interaction pattern across all scenario types.

ID	PROMPT NAME	SCENARIO TYPE	RESPONSE
OSL_001	Startup phase strategy framework	New position — market orientation	 
OSL_002	Low volatility regime playbook	MIXX LOW → income strategy	  
OSL_003	High volatility regime playbook	MIXX HIGH → defined risk, long vol	  
OSL_004	Trending market overlay strategy	MIXX TREND → directional spread	  
OSL_005	Choppy/neutral market protocol	MIXX NEUTRAL → theta decay, iron condor	  
OSL_006	Earnings event scenario builder	Pre/post earnings IV crush	  
OSL_007	Fed event options protocol	FOMC — straddle vs iron fly	  
OSL_008	Multi-leg spread constructor	Vertical, calendar, diagonal builder	 
OSL_009	Portfolio hedge design	SPX puts, VIX calls, tail risk	 
OSL_010	Scenario startup activation prompt	Session orientation — all tiers	

5 Market Profile & Order Flow

Value Area, TPO, Day Type, Order Flow imbalance, Delta divergence — Micro futures focus. Zilin Mao primary author.

ID	PROMPT NAME	OUTPUT	RESPONSE
MP_001	Market Profile daily setup	IB, VAH, VAL, POC, Day Type forecast	  
MP_002	Day type classification	Trend / Normal / Neutral / P-shape / b-shape	  

ID	PROMPT NAME	OUTPUT	RESPONSE
MP_003	Value area acceptance/rejection	Auction theory signal — above/below value	  
MP_004	Order flow imbalance alert	Bid/ask delta, aggressive volume, footprint	  
MP_005	Volume profile key levels	High volume nodes, low volume nodes, gaps	  
MP_006	TPO letter visualization brief	Text-based TPO description	
MP_007	Micro futures MP application	MES, MNQ, MCL — retail-scale MP	  
MP_008	MP + GEX confluence signal	Market Profile × Gamma Playbook	  

6 **Crypto Futures**

BTC/ETH basis, perpetual funding, CME vs perp spread, on-chain signal.

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
CRYP_001	BTC CME futures basis brief	CME vs spot — institutional premium	  
CRYP_002	Perpetual funding rate signal	Deribit/Binance vs CME	  
CRYP_003	BTC options GEX & sentiment	Deribit dealer flow → VAULT	  
CRYP_004	ETH basis & staking yield spread	ETH futures vs staking rate	  

7 **VAULT Output Templates**

Structured WATOS-scored output for all categories. Report Roster, Watchlist, Excel auto-archive with Metrixx disclaimer, subscriber ID, and watermark.

ID	PROMPT NAME	VAULT FORMAT	RESPONSE
VAULT_001	WATOS score generator — options	HIGH/MED/LOW per strike/expiry	
VAULT_002	WATOS score generator — futures	HIGH/MED/LOW per contract	
VAULT_003	Daily intelligence report template	Structured daily brief → VAULT	 
VAULT_004	Weekly Gamma Playbook report	GP synthesis → VAULT PDF	
VAULT_005	User VAULT upload confirmation	Validation + WATOS naming convention	
VAULT_006	Report Roster builder	Saved reports — name, date, instrument, WATOS score	

ID	PROMPT NAME	VAULT FORMAT	RESPONSE
VAULT_007	Watchlist intelligence brief	User watchlist instruments → daily brief	  
VAULT_008	Excel template — Metrixx standard	Disclaimer header, subscriber ID watermark. Auto-archives on generation.	

Phase 2

Macro, rates, and sentiment intelligence

Due: June 25, 2026

1

MIXX Volatility Index

▲

Regime classification, PCA composite score, ETF volatility regime, transition alerts.

ID	PROMPT NAME	OUTPUT	RESPONSE
MIXX_001	MIXX daily regime classification	HIGH / NEUTRAL / LOW / TREND signal	  
MIXX_002	MIXX ETF volatility regime	Sector ETF regime overlay	  
MIXX_003	MIXX PCA composite score brief	Four-layer score with weights	  
MIXX_004	MIXX regime transition alert	Change trigger + strategy implication	  
MIXX_005	MIXX vs VIX divergence signal	Metrixx vs CBOE comparison	  
MIXX_006	MIXX gamma layer input	Dealer GEX contribution to composite	 
MIXX_007	MIXX weekly summary report	Full regime brief → VAULT	

2

Futures & Basis Service

▲

CME futures basis, roll analysis, curve structure, COT sentiment — ES, NQ, CL, GC, ZB, ZN, HE, LE, ZC, ZW, ZS.

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
FUT_001	ES/NQ daily futures brief	E-Mini S&P, E-Mini Nasdaq	  
FUT_002	Crude oil futures basis analysis	CL, QM — WTI basis to cash	  
FUT_003	Gold futures basis & roll	GC, MGC — basis, forward curve	  
FUT_004	Treasury futures yield brief	ZB, ZN, ZT — yield curve structure	  
FUT_005	Ag futures seasonal basis	ZC, ZW, ZS — USDA WASDE overlay	  

ID	PROMPT NAME	INSTRUMENTS	RESPONSE
FUT_006	Live cattle / Lean hog brief	LE, HE — cash/futures basis, COT	  
FUT_007	COT disaggregated sentiment	All CME contracts — managed money	  
FUT_008	Micro futures entry protocol	MES, MNQ, MCL — retail sizing	  
FUT_009	Roll calendar & cost analysis	Quarterly roll — all major futures	 
FUT_010	Futures WATOS scenario report	Any futures instrument → VAULT	

3 Prediction Market Report TBD

Scope and data sources to be defined. Team to propose prompt framework and instrument coverage.

Scoping required. Jocelyn to assign one team member to research prediction market data sources (Kalshi, Polymarket, CME event contracts) and post a proposed prompt framework to the ILLINI TEAM channel. No prompt development begins until framework is reviewed and approved.

4 Macro & Rates Intelligence

Fed policy, yield curve, credit spread, DXY, rates regime — ZB, ZN, SOFR.

ID	PROMPT NAME	OUTPUT	RESPONSE
MACRO_001	Fed policy regime brief	FOMC stance, dot plot, forward guidance	  
MACRO_002	Yield curve structure analysis	2s10s, 3m10y, inversion signal	  
MACRO_003	DXY regime & cross-asset impact	Dollar → equities, gold, crude	  
MACRO_004	Credit spread alert	IG/HY spread, HYG/LQD signal	  
MACRO_005	CPI/PCE release scenario	Inflation print → rates + equities impact	  
MACRO_006	SOFR transition brief	Short-rate level + futures positioning	  

5 Equity Intelligence

Earnings scenario, sector rotation, relative strength, institutional flow.

ID	PROMPT NAME	OUTPUT	RESPONSE
EQ_001	Earnings scenario builder	Pre/post earnings — IV crush + direction	  

ID	PROMPT NAME	OUTPUT	RESPONSE
EQ_002	Sector rotation signal	11 GICS sectors — relative strength ranking	  
EQ_003	Institutional flow detector	Dark pool, block trade, unusual options activity	  
EQ_004	Single stock options brief	NVDA, TSLA, AAPL, MSFT, AMZN — key strikes	  

6 **Basis Sentiment Service**

COT disaggregated, EIA, USDA WASDE, CFTC — commodity sentiment scoring. Tier 1 data sources only.

ID	PROMPT NAME	DATA SOURCE	RESPONSE
BSENT_001	EIA weekly storage brief	EIA.gov — Tier 1 cleared	  
BSENT_002	USDA WASDE crop report brief	USDA WASDE/NASS — Tier 1 cleared	  
BSENT_003	COT managed money positioning	CFTC Disaggregated COT — Tier 1	  
BSENT_004	Baker Hughes rig count signal	Baker Hughes — Tier 1 cleared	  
BSENT_005	FRED macro overlay brief	FRED (St. Louis Fed) — Tier 1	  
BSENT_006	Commodity basis synthesis report	Multi-source — COT + EIA + USDA
